

The #1 Brand in Water Heaters Now Offers the #1 Brand in Chillers!

Sioux Chillers

**Cold Water for
Hot Weather
Concrete Production**

AquaSnap 30RB by

Carrier

Maximum Performance and Reliability— Sioux has the **ONLY** National Agreement with Carrier Corporation

What Does This Mean for You?

- 24/7/365 parts & service availability worldwide
- Carrier certified start-up included on every unit
- 150+ years of water heating & cooling experience
- Carrier Chillers + Sioux Heaters =
#1 in the World #1 in the World

The Best You Can Get

AquaSnap 30RA18

Air-Cooled Water Chiller Systems

Sioux air-cooled water chiller systems are available as stationary or portable units with capacities for any size operation. Compared to utilizing ice to cool concrete, Sioux chillers reduce chilling costs as much as 95%, putting money back in your pocket!

Precise Control, Greater Consistency

Sioux Chillers allow for precise control of the water temperature, ensuring consistent concrete temperature and quality. Sioux can provide the right chiller for your concrete production needs.

Let Sioux Design it for You

Sioux is already the industry leader in water heating systems for cold weather concrete production. Let our experienced engineers design a system for your warm weather concrete production needs. From the coldest to the hottest conditions and everything in between, Sioux has what you need to produce consistent concrete year-round.

Why Work With Sioux?

- Year after year, Sioux is rated the #1 brand, the most familiar brand, and most used brand of water heaters among precast and ready-mix concrete producers (based on Concrete Producer consumer surveys).
- Exceptional reputation for customer support and parts availability.
- More than 40 years of experience designing equipment exclusively for the concrete industry.
- Extensive engineering design capabilities for standard and customized systems.
- Sioux exports to over 70 countries worldwide – Over 40 years of exporting experience.
 - *Recipient of 2009 President's "E" Award for Exporting Excellence (only awarded to 20 companies each year).*

Features	Benefits
Microprocessor controlled, air-cooled chiller with diagnostic control panel and communication ports.	State of the art technology for maximum efficiency and reduced downtime. Diagnostic controls make it easy and fast to identify and resolve problems locally or remotely.
Flexible epoxy polymer coating is standard on all coils.	Fins are protected from mildly corrosive environments, exactly the design needed for concrete production facilities. This type of coil protection ensures efficient operation in adverse environments.
<p>Standard warranty is one year from start-up or 18 months from time of shipment. Start up by Authorized Carrier Service Technician is included on every system sold by Sioux. Five year warranty is available and is recommended.</p> <p>Toll-free phone number for warranty and service dispatch is available 24 hours a day, 365 days a year.</p> <p>Services are available worldwide including over 100 service centers throughout North America alone.</p>	Carrier-trained, certified technician will do start up on each chiller to ensure it is installed and operating correctly at the jobsite. This reduces costly service calls and delays in operations and production. Provides baseline performance data for future troubleshooting and diagnostics.
Chiller comes completely factory assembled.	Easy to unload and install. No time-consuming field installation required for standard packaged systems, saving time and money.
Compressor and piping design includes vibration isolation.	Robust design is quieter and more durable than others in the marketplace.
Environmentally sound refrigeration circuit includes filter drier, moisture indicating sight glass, thermal expansion device, and complete operating charge of both refrigerant and compressor oil.	No additional cost for oil and refrigerant in the field. No need to do field charging of refrigerant system. Reduces installation time and saves money.

Liters Cooled Per Hour*	1,556	2,336	4,671	7,787	9,346	10,902	12,458	14,071	15,573	17,133	18,689

*Based on a 35°F (19.4°C) temperature drop, a 75°F (24°C) inlet, and a 40°F (4.4°C) outlet temperature.

Lowest output temperature on standard units is 40°F (4.4°C). Custom units are available to achieve a lower temperature.

Sioux is the leader in water heating and cooling equipment for the concrete industry.
